

Eagle Flight Plan — System Features

Epic

As a student,
when I want to do activities that prepare me to get a job when I graduate,
I want a checklist of tasks and events I can complete each semester I am in school,
so that I am prepared to successfully apply for a job.

This document breaks the epic into system features. Each feature includes one or more user stories that can be planned, implemented, and tested independently.

Actors

Career Services owns the checklist. Students complete it. Faculty and advisors can view progress for advising; they do **not** submit tasks or sign off on items.

Role	What they do
Student	Follows a per-semester checklist of tasks and events to get job-ready
Career Services staff	Add and edit the official tasks and events students see
Faculty / advisors	View a student’s progress to advise them; no catalog editing, suggestions, or sign-off

Out of scope: professors suggesting custom tasks, faculty sign-off queues, and extra-major request workflows. Those added more process than they were worth.

Feature summary

ID	Feature	Who it serves	What it does
F1	Student profile and current semester	Student	Matches the plan to the student’s year and major
F2	Semester checklist and dashboard	Student	Dashboard: campus-wide + my major (completable). Browse other majors: view-only
F3	Multi-semester flight plan	Student	Shows the full plan through graduation
F4	Task tracking	Student	Complete, reopen, and review career-prep tasks

ID	Feature	Who it serves	What it does
F5	Event tracking	Student	Find, attend, and complete career events
F6	Item details and guidance	Student	Explains how, why, and when to complete an item
F7	Job-readiness progress	Student; faculty/advisors (view)	Shows how prepared the student is to apply
F8	Reminders and next actions	Student	Points to the next task or event this semester
F9	Official task and event catalog	Career Services	Add and edit the tasks and events students see

F1. Student profile and current semester

The system needs enough student context to show the right semester checklist (for example, freshman fall vs. senior spring) and the student's **major** so major-specific catalog items appear for the right students.

Stories

F1-S1 — Set up my academic standing

As a student, when I start using Eagle Flight Plan, I want to record my major, expected graduation term, and current year/semester, so that my checklist matches where I am in school.

F1-S2 — See my current semester plan first

As a student, when I open the system, I want to land on my dashboard for the current semester (campus-wide items plus my major's items), so that only my relevant work pops up first.

F1-S3 — Update my standing if it changes

As a student, when I take a leave, change majors, or shift my graduation date, I want to update my academic standing, so that future checklists stay accurate.

F2. Semester checklist and dashboard

The core of the epic: a checklist of tasks and events for each semester, owned by Career Services. **Whoever creates a task or event decides** whether it is campus-wide or major-specific.

- **Dashboard (default):** campus-wide items plus **only** major-specific items for the student's own major. Those are what "pop up."
- **Browse (optional, view-only):** the student can look at major-specific tasks **across all majors**. Other-major items do not appear on the dashboard and **cannot be marked complete**. This keeps students from farming points or credit on easier work from another major.

- Major-specific items are **color-coded** so they are obviously different from campus-wide items.

Stories

F2-S1 — Dashboard shows only my work

As a student, when I open my dashboard, I want to see this semester's campus-wide tasks and events plus major-specific items for **my major only**, so that other majors' tasks do not clutter what I need to do.

F2-S2 — Distinguish tasks from events

As a student, when I look at a semester checklist, I want tasks (things I complete on my own) and events (things I attend) clearly labeled, so that I know how to finish each item.

F2-S3 — Mark only my dashboard items complete

As a student, when I finish a campus-wide or my-major task or event, I want to check it off, so that progress and points come from work that actually applies to me.

F2-S4 — See remaining work on my dashboard

As a student, when I have not finished everything that applies to me, I want incomplete campus-wide and my-major items to stay visible, so that I know what is left before the semester ends.

F2-S5 — Filter or sort my dashboard

As a student, when a semester has many items, I want to filter by type (task vs. event), source (campus-wide vs. my major), or status (done vs. not done), so that I can focus on the next activity I can actually complete.

F2-S6 — See major-specific items by color

As a student, when I see a major-specific item, I want it color-coded in a way that is clearly major-specific, so that I can tell it apart from general Career Services tasks and events.

F2-S7 — Browse other majors' tasks (view-only)

As a student, when I want to see what other programs recommend, I want to view major-specific tasks across **all majors** without being able to complete them, so that I can explore ideas but cannot farm points from another major's easier items.

F3. Multi-semester flight plan

Job prep is spread across every semester in school, not only the current one.

Stories

F3-S1 — Browse the full plan

As a student, when I want to plan ahead, I want to view checklists for every semester from now until graduation, so that I understand the whole path to being job-ready.

F3-S2 — See past semester history

As a student, when I look back at earlier terms, I want to see which items I completed, so that I can prove I have been preparing over time.

F3-S3 — Preview upcoming semesters

As a student, when I am planning next term, I want to preview the next semester's tasks and events, so that I can register for events or start longer tasks early.

F4. Task tracking

Tasks are activities the student can complete independently (resume, LinkedIn, cover letter, career assessment, and similar work). Official tasks live in the Career Services catalog (F9).

Stories

F4-S1 — Complete a task

As a student, when I finish a campus-wide or my-major career-prep task, I want to mark it complete and record the completion date, so that my checklist reflects real progress (not work copied from another major's list).

F4-S2 — Reopen a task if I need to redo it

As a student, when a task needs an update (for example, an outdated resume), I want to mark it incomplete and work on it again, so that my materials stay ready for applications.

F4-S3 — Attach or note evidence of completion

As a student, when I complete a task, I want to add a short note or file (such as a resume version), so that I can reuse that work when I apply for jobs.

F4-S4 — See recommended order

As a student, when some tasks should happen before others, I want the checklist to show a suggested order, so that I do not skip foundational work (for example, writing a resume before a career fair).

F5. Event tracking

Events are scheduled activities such as career fairs, workshops, info sessions, and mock interviews. Students mark attendance themselves; faculty do not sign off.

Stories

F5-S1 — See events on my semester checklist

As a student, when my semester includes career events, I want those events listed with date, time, and location (or link), so that I can show up prepared.

F5-S2 — Mark that I attended an event

As a student, when I attend an event, I want to check it off my list, so that event-based prep counts toward job readiness.

F5-S3 — Find events I can still attend

As a student, when the semester is underway, I want to see upcoming events that are still open, so that I do not miss activities that help me apply for a job.

F5-S4 — Handle events I missed

As a student, when I miss a required or recommended event, I want to see whether there is a makeup option or a later offering, so that one missed date does not block my plan.

F6. Item details and guidance

A checklist is only useful if the student knows what “done” looks like and why the item matters for job applications.

Stories

F6-S1 — Read how to complete an item

As a student, when I open a task or event, I want clear instructions, resources, and a definition of done, so that I can complete it correctly.

F6-S2 — Understand why it matters

As a student, when I am deciding what to do this week, I want a short explanation of how the item helps a job application, so that I stay motivated to finish it.

F6-S3 — See timing expectations

As a student, when an item is best done early or late in the semester, I want to see a recommended window or due date, so that I finish it while it is still useful.

F6-S4 — See which major an item is for

As a student, when I open a color-coded major-specific item, I want to see which major it is for, so that the color coding is explained — including when I am browsing another major’s list.

F7. Job-readiness progress

The epic’s outcome is being prepared to successfully apply for a job. Progress should make that outcome visible using **dashboard items** (campus-wide plus the student’s major). Faculty and advisors may view a student’s progress to support advising, without owning the checklist.

Stories

F7-S1 — See semester completion

As a student, when I am working through a term, I want a simple progress indicator for this semester's checklist, so that I know whether I am on track.

F7-S2 — See overall job-readiness

As a student, when I think about applying for internships or full-time jobs, I want an overall view of completed vs. remaining prep across all semesters, so that I know if I am ready to apply.

F7-S3 — See application-critical gaps

As a student, when I am about to apply, I want the system to highlight unfinished items that most affect applications (resume, interview practice, career fair, and similar), so that I can close the gaps that matter first.

F7-S4 — Advisor views student progress

As a faculty member or advisor, when I meet with a student about career prep, I want to see their flight-plan progress, so that I can advise them without managing their checklist.

F8. Reminders and next actions

Students should not have to remember the whole plan unaided. Next-up items and reminders come from the **dashboard set** (campus-wide + the student's major), not from other majors' lists.

Stories

F8-S1 — Get a next-up item

As a student, when I log in, I want the system to suggest the next campus-wide or my-major task or event for this semester, so that other majors' items never appear as my next step.

F8-S2 — Get notified about upcoming events

As a student, when an event on my checklist is coming up, I want a reminder, so that I do not miss it.

F8-S3 — Get a mid-semester check-in

As a student, when the semester is half over and I still have incomplete items, I want a reminder of what is left, so that I can finish before the term ends.

F9. Official task and event catalog

Career Services owns what students see. Staff add and edit tasks and events so the plan stays current. **The person who creates the item decides** whether it is campus-wide or major-specific (one or more majors).

Stories

F9-S1 — Add a task or event

As Career Services staff, when I create a career-prep activity, I want to choose whether it is campus-wide or major-specific (and which majors), and assign it to one or more semesters, so that it shows on the right students' dashboards.

F9-S2 — Edit a task or event

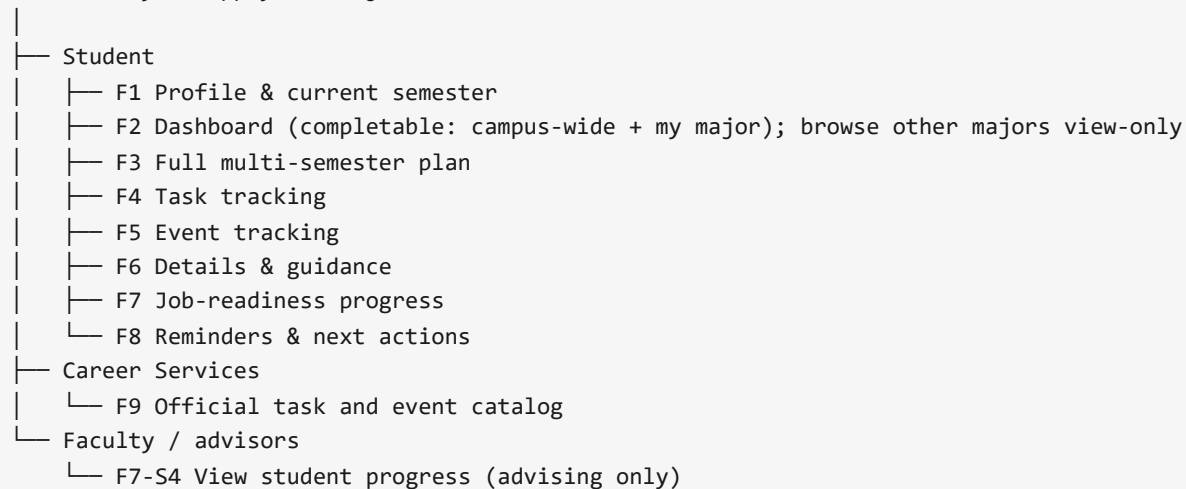

As Career Services staff, when details change (date, instructions, which semester or majors it belongs to), I want to edit the item, so that students are not working from outdated information.

F9-S3 — Retire an item

As Career Services staff, when an activity is no longer offered, I want to retire it from future checklists without erasing student history, so that past completions still count.

Story map (epic → features)

Student wants a per-semester checklist of tasks and events to be ready to apply for a job

Acceptance notes for the epic

The epic is satisfied when:

1. A student can identify their current semester and major and land on a dashboard of campus-wide items plus **their** major-specific items only.
2. A student can optionally **view** major-specific tasks across all majors; those items are not completable and do not appear on the dashboard (no point/credit farming).
3. A student can mark tasks and events complete themselves (no faculty sign-off).
4. A student can look ahead and back across semesters and tell whether they are ready to apply for a job.
5. Career Services can add, edit, and retire items; the creator chooses campus-wide vs. major-specific.

6. Faculty and advisors can view progress for advising, but they do not suggest tasks or approve completions.
7. Major-specific items are color-coded so students can tell them apart from campus-wide items.
